# COMPANY INTRODUCTION

# ABOUT KIP

Kanz International Projects is a leading facility under the management of Bin Omeir Group, a business established in the mid-sixties.

Since 2009, KIP marketed a variety of brands to meet to the needs of outstanding customers in large scale sectors.
The drive behind our passion at KIP lies at the heart of our customers goals by providing them with the best solutions to their businesses.

As for our high-performance teams, we are ready to forward with our customers from consultation to implementation , as well as after-sales services to ensure the development of their business.

## VISION

Our vision at KIP, we aim to lead the market and drive our growth line while providing our customers with exceptional solutions to ensure the success of their business.

## MISSION

- Ensure the ability to provide innovative technologies, convenience products and high-quality services that meet customers' requirements and diverse needs and exceed their expectations.
- Enhance customers' satisfaction by providing excellent services.
- Understanding integrated solutions and supporting services based on needs of our customers.
- Improve the development of our country by helping our customers achieve their goals.

# GLOBAL NETWORK OF SUPPLIERS & SERVICES

Our drive to support our customers in promoting their business and strengthening the country's economy and growth has led us to develop partnerships with international suppliers of high-quality products in Europe, USA and Turkey.
At Treasure Global Projects, we reach out to multiple international partners to provide sufficient expertise to meet the needs of our customers.
Being alive in the 21st century is really important to lead and continue our business through trustworthy and dedicated international companies that serve the implementation of our customers' business strategy.

## SERVICES OFFERED BY KIP

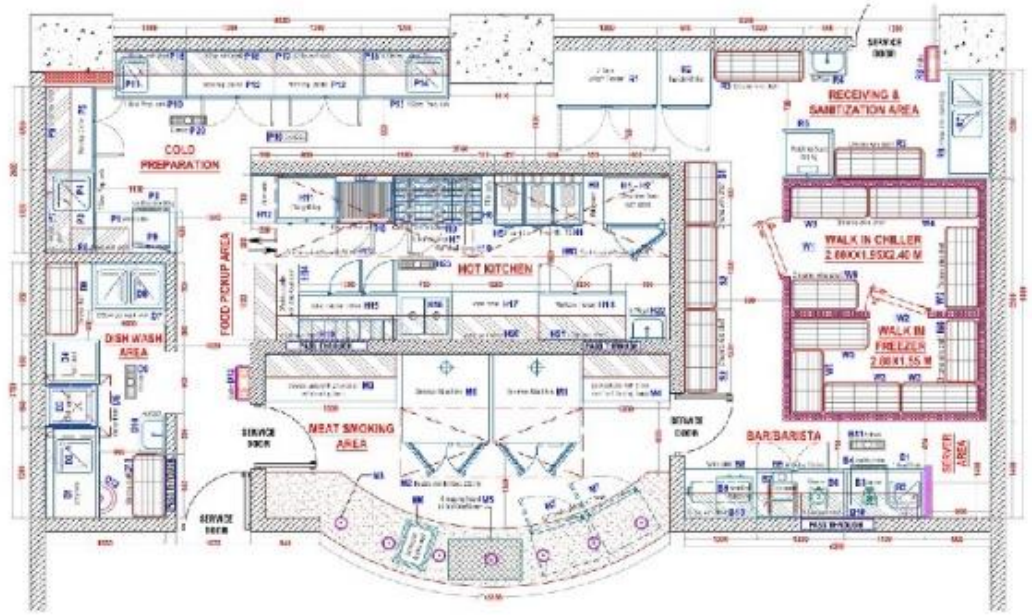

- **Consulting and kitchen design.**
- **Installation and processing.**
- **Stainless steel manufacturing.**
- **Customized mobile kitchens.**
- **After-sales services and technical support.**

# KIP FABRICATION UNIT PROFILE

# FABRICATION UNIT

KIP Fabrication unit is located in Misfah, Sultanate of Oman. We manufacture unique stainless-steel products to meet the needs of your headquarters. KIP is regarded as one of the leading forces in the industry and is known for its custom built stainless steel benching, laundries, wall shelves, cabinets and kitchen hoods. The range of production line items, such as: Bain Maries, Hot Food Bars, Mobile Food Transporters and Charcoal Chicken Rotisseries. All stainless steel equipment is made with meticulous care and expertise that comes from over three decades of experience and pride in making top quality.

Every item manufactured by KIP has been designed to the highest standards, using the best quality materials and excellent workmanship. We are extremely proud of the quality and workmanship that is inherent in each item produced and we continue to enhance our range with new and updated design. As a company we are always striving to improve our business to help serve our customers in terms of design, manufacturing, as well as finished products.

# GRADES OF STEEL

As the most widely used of all stainless steel, Grade 304 stainless steel is most notably present in industrial kitchen equipment application. It is a highly heat-resistant grade, and offers good corrosion resistance to many chemical corrodents, as well as industrial atmospheres.

KIP uses Grade 304 mostly and can be done in different high quality grade like 316 and more. It depends upon the standards requested from the clients.

## STANDARD COMPONENTS

## STANDARD TECHNICAL FEATURES

### (6) SAFETY PROTECTIONS

#### ❑ SEMI-HERMETIC RECIPROCATING COMPRESSOR

- Electronic motor protection with thermal monitoring with PTC sensors.
- Internal pressure relief valve to protect the compressor against high discharge pressures.
- Terminal box enclosure class is IP65 or IP54 (as per standard IEC34).
- IP65 for terminal box enclosure for units below 20 HP
- IP54 for terminal box enclosure for units above 20 HP

#### ❑ FAN MOTOR

- Thermal protection.
- Protection grill on propeller side for safety of personnel conforms to machinery directive (CE)
- Class F insulation as per standards NFC 51200-11 and CEI 34-1.
- Terminal box enclosure class is IP54 (as per standard IEC34).

#### ❑ CRANKCASE HEATER FOR COMPRESSOR

- To guard compressor against flood back conditions and to eliminate oil fluffing on start up.
- Insertion type, temperature dependent control.
- Self regulating PTC heater.
- Standard mandatory for :
  - Outdoor installation of condensing unit.
  - Long shut-off peridos
  - High refrigerant charge
- For compressor 1.5 HP to 5 HP
  The crankase heater is mounted in housing pocket ( at bearing cover ).
- For compressor 7.5 HP to 40 HP
  The crankase heater is mounted into pre-mounted heater sleeve ( near sight glass ).

#### ❑ Dual HIGH / LOW PRESSURE CONTROL FOR COMPRESSOR

- To protect the compressor against high discharge pressures and low suction pressures.
- Terminal box enclosure class is IP30 (as per standards IEC529/EN60529)

#### ❑ OIL PRESSURE DIFFERENTIAL CONTROL FOR COMPRESSOR

- To protect compressor against insufficient oil pressure due to lack of oil.
- Connected to the oil pump discharge outlet and the crankcase pressure.
  The oil pressure control breaks the control circuit when the pressure difference between the oil pump outlet and the crankcase drops below 0.7 bar, then the compressor will be stopped after a 120 seconds delay after having solved the problem, the control has to be reset manually.
- Terminal box enclosure class is IP20 (as per standards IEC529/EN60529).

#### ❑ Safety pressure relief valve for liquid receiver

- To protect the liquid receiver against excessive pressures as per PED directive.

# Supply and Fixation of Coffee Machines

Maintenance Team is Ready and Functioning,
Spare Parts are available.
AMC is Recommended after Warranty.
